Alliance of Forest Communities Bosque Somos

Seal of the Indigenous Community or Ejido

Signature of the Bosque Somos Representative

IMPACT

Supporting Local Indigenous Communities

These communities are the rightful stewards of these territories. With your support, we work alongside them to increase their income and provide training that enhances their quality of life through practices that promote ecosystem conservation and regeneration.

Carbon Sequestration

Together, we contribute to mitigating global warming, as trees absorb CO₂ from the atmosphere and help cool the air.

Protecting Biodiversity

You are contributing to the conservation of the Monarch region's ecosystem, home to an extraordinary diversity of flora and fauna that depend on healthy forest density to thrive, including the monarch butterfly during its hibernation season.

Water Conservation

Protecting the Monarch Butterfly Biosphere Reserve means safeguarding the water generated by these forests. With your participation, we are helping address the water crisis in central Mexico.

THANK YOU FOR BEING PART OF BUILDING A SUSTAINABLE FUTURE!
